FOR WINNEBAGO COUNTY

Community Level:	Cases per Day (7-Day Average):	Hospitalizations in Fox Valley:
LOW	**15**	**22**
No change in level since 2/16/23	-1 case on avg. since 2/22/23	+3 patients since 2/22/23

Key Points:

- Community Level is **LOW**.
- WCHD currently is offering the Pfizer vaccine (including the bivalent vaccine and booster) to those over the age of 6 months.
- General recommendations (click each statement for more information):
    - #KnowBeforeYouGo - Test before going to group events to help protect others.
    - Get tested if you are ill or suspect exposure.
        - Telehealth Services are now available! Anyone with a positive test can receive free treatment via video chat or phone. Please visit the DHS website for more information.
    - Vaccinate or get your booster if you are eligible.
    - If you are at high risk for severe illness, speak with your health care provider about precautions you can take.
    - Consider wearing a mask if you are in contact with someone who is high risk.

**Updated bivalent vaccine now available for anyone 6 months and older!**

With various respiratory illnesses spreading, it is important to protect yourself and others against influenza, RSV, and COVID-19. To help prevent the spread of these illnesses you can:

- Stay home if you are sick
- Get tested if you have symptoms

- Wash your hands frequently
- Get vaccinated against the flu and COVID-19

Staying up to date with vaccines, getting tested if you have symptoms or were exposed, and isolating if infected continue to be important tools in reducing spread of COVID-19.
