*WCPH case counts refer to Winnebago County Public Health jurisdiction, which excludes the portions of the [City of Menasha](#) and [City of Appleton](#) that fall within Winnebago County.

Spotlight: Influenza

- The annual influenza letter with the summary of the [2023–2024 ACIP recommendations](#) is now available.

Spotlight: Measles

- This month, there has been a confirmed case of measles in southeast Wisconsin.
- Measles is a Category 1 Reportable Disease and suspected/confirmed cases must be immediately reported to the local health department.
- View the [DHS website](#) to learn more about symptoms and testing.

Spotlight: RSV

- An RSV immunization is available for certain populations.
- Full recommendations can be found [here](#).

Spotlight: Current Drug Shortages Affecting Treatment of Syphilis and Gonorrhea

- A recent shortage of penicillin G benzathine (syphilis treatment) and Gentamicin (gonorrhea treatment) could create treatment challenges.
- View this [DHS alert](#) to see alternative treatment options.

Spotlight: Congenital Syphilis in Wisconsin

- In recent years there has been an increase in congenital syphilis cases in Wisconsin.
- All pregnant patients should be screened for syphilis [at least three](#) times during pregnancy.

Spotlight: COVID-19

- Stay up to date with COVID levels in our community by following the latest Wisconsin [data](#).

Reportable Diseases

A selection of common reportable disease are showcased to the left; more extensive lists can be found in the [full-length report](#).
