

WINNEBAGO COUNTY PARKS DEPARTMENT

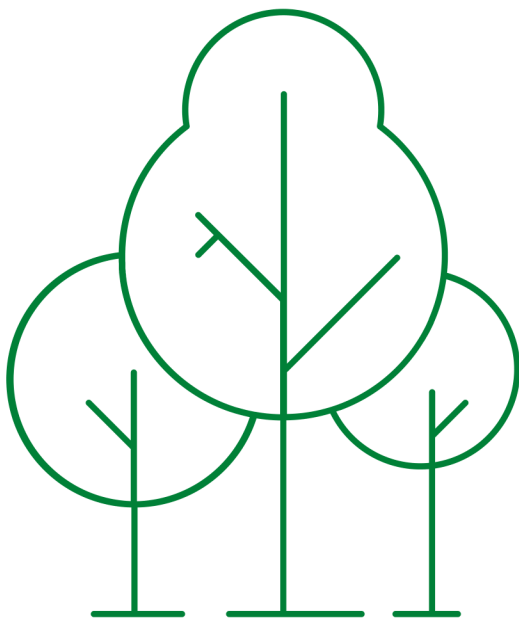

TREE PROGRAM

Emerald Ash Bore is devastating trees throughout our local parks and nature preserves. The Winnebago County Community Park has more than 500 ash trees alone. In an attempt to preserve the tree canopy for future generations, new trees have to be planted as the infected ash trees will die over time.

WE NEED YOUR HELP TO PLANT TREES

All donations made toward our Tree Program will go directly toward the purchase and planting of new trees throughout our local park lands.

If you would like to discuss the types of trees available and planting locations, please contact the Winnebago County Parks Department at (920)232-1960 or email us at parks@winnebagocountywi.gov. Our tree specialist will guide you through the process of selecting the perfect tree(s).

Prices for trees vary by season and market conditions. Certain tree types may not be available depending on the current tree market and season.
