Wisconsin Ordnance Works is Seeking High-Speed/Low-Drag individuals
to Become Part of our Manufacturing Family

Veterans are Encouraged to Apply!

Committed to Excellence Supporting America's War Fighter

Wisconsin Ordnance Works is an Oshkosh-based veteran-owned defense contractor that thrives on supporting our military through the manufacture and supply of precision components for tracked combat vehicles

Open Positions:

Weekend shift lead (Friday-Sunday, work 36 hours, receive pay for 40 hours)

Machinist – Either Mon-Thurs 4x10 hrs, or weekend shift, Fri-Sun (36 hours w/pay for 40 hours)

Who are we looking for?

Highly motivated individuals who like to think, are always seeking to improve everything they touch, and are not afraid of hard work.

Why are we looking?

Demand has grown to a level at which new team members are required for the company to meet the needs of our military. Wisconsin Ordnance Works services long-term contracts and is hiring now to satisfy the known growth that these contracts represent.

When?

Immediately. First shift Monday through Thursday (The typical schedule is 4x10, but is driven by demand. Overtime should be expected at peak demand times, and a “split” first shift is deployed when specific processes need to meet extended daily run targets.) The weekend shift is Fri-Sun, 3x12 (pay for 40 hrs)

Qualifications:

- You desire to excel and grow professionally (your goal is to become a skilled machinist)
- You are able to lift up to 50lbs
- You look a challenge in the face and sneer
- Your co-workers are like family to you, and you would have it no other way
- You can (and desire to) be trained to be an expert in operating sophisticated machinery
- You don't settle for anything less than 100% quality
- You are seeking a career home w/great rewards
- You are selfless – willing to go the extra mile when asked
- If you are already a skilled machinist with VMC and VTL experience – even better!

Duties (following completion of training):

- Set-up and operation of heat treatment equipment
- Operation of a broad array of CNC machining centers
- Paint prep and part painting
- Perform physical and CMM-assisted part quality inspections
- Preventative maintenance
- Hit production targets
- Operation of forklift and miscellaneous power tools
- Accept, promote and endorse through example all safety regulations and procedures
- Doing whatever it takes - wherever the need exists - to play a key role in the manufacturing of precision components that keep our warfighters ready – always!

Benefits:

Profit Sharing, Medical, Dental, Vision, 401K w/Company Match, Paid Time Off

If you are the right candidate, and lack machining experience, we will train you!
